

16TH ANNUAL PEAK CYBER SYMPOSIUM

SPEAKER BIO

William Hoffman
Chief Security Officer
FrontLine Cyber Solutions

William Hoffman is the strategic technology implementation expert behind FrontLine's industry-leading cybersecurity solutions. With over 25 years of proven experience in Information Technology (IT) and more than a decade in Operational Technology (OT), Will has worked extensively with private industry and corporations supporting government contracts.

His expertise spans the design and development of advanced security technologies, including firewalls, intrusion detection and prevention systems, encryption software, and virtual private networks. A recognized authority in reverse engineering, custom exploit development, and network architecture, Will combines deep technical insight with hands-on operational experience.

Will is highly skilled in conducting information security audits, vulnerability assessments, and network penetration testing to identify weaknesses and implement the most effective security protocols. His track record reflects a unique ability to integrate cutting-edge security innovations into mission-critical IT and OT environments, ensuring robust defense against evolving cyber threats.

16TH ANNUAL PEAK CYBER SYMPOSIUM

SEPTEMBER 9 - 10, 2026 | COLORADO SPRINGS, CO
