

16TH ANNUAL PEAK CYBER SYMPOSIUM

SPEAKER BIO

Zac Mott
Manager, Systems Engineering and
Consulting Architects
Fortinet Federal

Zac Mott, CISSP, currently serves as Systems Engineering Manager for Fortinet Federal, leading the Federal Civilian Systems Engineering and Consulting Systems Architecture teams. With over 25 years of experience in systems, networking, and cybersecurity, he specializes in helping Federal agencies navigate modernization initiatives with mission-oriented solutions. His work centers on aligning these efforts into cohesive strategies that simplify architectures, reduce costs, and improve security. A former U.S. Marine Corps Cyber Network Operations Engineer, Zac brings an operational perspective that bridges defense and civilian missions. He is passionate about helping government organizations achieve resilient, future-ready security architectures.

16TH ANNUAL PEAK CYBER SYMPOSIUM

SEPTEMBER 9 - 10, 2026 | COLORADO SPRINGS, CO
