16TH ANNUAL PEAK CYBER SYMPOSIUM

SPEAKER BIO

Travis Steele
Chief Architect, Air Force and Space Force
Red Hat

Travis Steele serves as a Chief Architect and thought leader within the global office of the CTO at Red Hat, Inc. He supports his customers as a primary interface with mission and technology leaders in the community including ecosystem partners, advocating for the warfighting needs of the Air and Space forces and their mission partners within Red Hat products and global engineering.

For more than two decades, Travis has led enterprise IT services and operations, as well as command & control and situational awareness efforts within defense agencies and commercial industry. At the Hertz corporation, he led global IT services driving several worldwide digital transformation and system modernization efforts.
Prior to joining Red Hat, he served in senior technical and leadership roles within the systems integrator community, maintaining a focus on government mission requirements.

Travis is a proud veteran of the United States Navy, a graduate of The Wharton School of Business Executive Leadership program, and holds dual master's degrees in business administration and information technology.
