

16TH ANNUAL PEAK CYBER SYMPOSIUM

SPEAKER BIO

Halie Anthony
Technology Executive
Founder & CEO, RISE Executive Coaching

Halie Anthony is a technology executive and the Founder and CEO of RISE Executive Coaching. She currently serves as Program Manager for the U.S. Nuclear Regulatory Commission's (NRC) Enterprise End User Computing (EUC) Program at Leidos. With more than 25 years of leadership experience spanning federal government, the Department of Defense, aerospace, healthcare, higher education, and executive coaching, she has built a career helping organizations and leaders achieve operational excellence, drive innovation, and lead through complexity.

In her current role, she leads the enterprise program responsible for delivering secure, reliable, and innovative end-user technology services across the agency. She provides executive leadership for service delivery, operational excellence, customer engagement, strategic initiatives, and continuous improvement in support of the NRC's mission.

Prior to her current role, Halie served as the IT Enterprise Operations Manager for NASA at Leidos, where she led enterprise operations and technology initiatives supporting one of the nation's premier federal agencies. Before joining Leidos, she served as Operations Manager for Clinical Engineering and later as a Health System Manager over Ancillary Applications at UCHHealth. Her teams managed enterprise medical device operations, medical device integration, critical clinical applications, deployed innovative initiatives including the Mobile Stroke Unit and telehealth technologies, and led efforts to strengthen the cybersecurity posture of connected medical devices.

In addition to her federal leadership roles, Halie is the Founder and CEO of RISE Executive Coaching, where she partners with executives and emerging leaders to strengthen leadership effectiveness, navigate organizational change, and build high-performing teams. She is also an adjunct professor and Lead Instructor for the College of Biomedical Equipment Technology, where she teaches information technology, cybersecurity, medical device integration, and leadership.

Halie holds a bachelor's degree in Business Administration and Management and an MBA from Colorado Technical University, along with numerous technical, cybersecurity, leadership, and coaching certifications. Drawing on extensive experience across government, healthcare, cybersecurity, IT operations, executive coaching, and higher education, she brings a practical, mission-focused perspective on leading complex organizations, driving operational excellence, fostering innovation, and developing resilient, high-performing teams.

16TH ANNUAL PEAK CYBER SYMPOSIUM
