Jordan "Cancer" Scott
Solutions Architect
Parsons

Former Presidential Candidate Jordan "Cancer" Scott (POTUS, 2020) has done many things since birth. He's gotten his Bachelor's and Master's degrees in Computer Engineering and is working on a PhD in Security. He passed his CISSP on the first attempt with just a month of self-study even though he didn't go back to review the flagged questions. He's been a Chapter President of the local Association of Old Crows for like a decade now and is/was a Director on the board of the Denver chapter of Infragard. He's done standup comedy based on cyber security twice and didn't get boos. After almost 20 years of experience including Army Infantry, Electronic Warfare, System of Systems Engineering, and now Cyber stuff, Jordan is a Solutions Architect for Parsons and owns Code Talkers Engineering.
